30mm Handlebar Riser Kit With Cover For Indian Scout Models

With this handlebar riser you position the handlebars 30 mm higher on the original triple tree.

Due to the ingenious construction the elevation is not visible.

In addition, the included cover discreetly covers the otherwise unsightly exposed cables between the two risers.

The parts are finished with a gloss black plastic coating.

All necessary parts for mounting are included in delivery.

Handlebar end mirror for 17-UP Indian FTR or Scout Models

The mirror housing is black and in 2Stripes design (contrast cut).
The surface of the housing is made of CNC 3D milled aluminum.

The mirror is made of a tinted convex glass (reduces glare).

Integrated into the housing: Exchangeable impact protector made of black plastic.

This item prevents the housing against ugly scratches caused by bumping on the house or garage wall when parking the bike, for instance, **Note: This function is only given when the narrow side of the mirror housing is turned to the outwards.**

Attention! A mounting kit is required to mount the mirrors
